EXPERIENCE

VENTii | VENTii.co (Mental Health AI Startup)   **Mar.. 2024- Present**
Technical Lead & Developer   *Remote*
- Built and launched the VENTii platform, developing the frontend with **React.js** and the backend with **Django.**
- Integrated custom **AI** models for personalized mental health support and optimized system security and scalability.
- Led **agile** development cycles and improved user experience through continuous iteration and testing.
- Worked closely with **UX/UI** designers to refine user experience based on testing and analytics insights.

Civiconnect (Co-op)   **Jan. 2023 - Apr. 2023**
Web Developer & Cloud Computing Intern   *Remote*
- Rebuilt and optimized websites using **Python**, **SQL**, **Webflow**, and **Figma**, leading to a **23-35%** increase in small business online traffic.
- Provided technical support for **Windows** and **iOS** systems, troubleshooting technical issues, and boosting end-user satisfaction.
- Led client-facing web development projects that improved brand awareness for Ontario-based small businesses.

RE/MAX   **June 2022 - Dec. 2022**
Technical Administrative Assistant   *Brampton, ON*
- Managed workflows and databases, improving scheduling and access.
- Supported the digital marketing team with CRM system updates and data management, ensuring real-time tracking of leads and listings.
- Organized internal communication using cloud-based platforms, enhancing team collaboration and record-keeping.

Shared Services Canada (Co-op)   **Jan. 2022 - Apr. 2022**
ETL Developer Intern   *Remote*
- Developed a programming model that reduced software errors by **30%**, enhancing software functionality and organizational workflows.
- Supported **ETL** processes and database operations, gaining hands-on experience in data transformation, cleaning, and automation.

PROJECTS

AI-Powered Knowledge Hub | Full-Stack Document Management Platform   **May. 2025**
- Developed a full-stack web app for uploading, summarizing, and searching documents using OpenAI-powered NLP to improve internal knowledge access.
- Built a Spring Boot REST API for file handling, AI summarization, and PostgreSQL storage.
- Designed a responsive Next.js frontend with Tailwind CSS for document uploads and AI summaries..

Trend Tailor | AI Newsletter and Content Automation Platform   **Jan. 2025 - Apr. 2025**
- Developed a **Django-based SaaS** platform that automates news aggregation, AI-driven content creation, and scheduling across social media platforms.
- Led agile project management using **Jira**, managing sprints and backlog for efficient feature development.
- Developed user account interfaces in **React.js** and integrated authentication workflows with **Django** backend.
- Performed **unit testing** across modules, increasing system reliability and reducing production bugs.
